Why Z-DENS Polypropylene Vent System

Polypropylene (PP) is comprised of only 2 elements carbon & hydrogen and is made without the use of any toxic or carcinogenic materials, heavy metals or chlorides.

PP is manufactured from propylene monomer, a waste gas of the petroleum industry which used to be burned off increasing greenhouse gases. Therefore the more PP used the LESS greenhouse gases are emitted.

PP has a higher maximum flue gas temperature limit (230°F) as compared to PVC (149°F) & CPVC (194°F). PP is easily 100% recyclable where PVC & CPVC is not due to its chemical composition and various additives.

- PP is environmentally friendly.
- PP has a higher temperature limit and range (working & softening) making it a safer vent material.
- PP is non-toxic.
- PP is more chemically resistant to aromatic hydrocarbons (found in fuels i.e. benzene and toluene) and acids (sulfuric, nitric & hydrochloric) as compared to PVC & CPVC.
- PP will not leach out any chlorides which can attack metal heat exchangers.
- When burned PP releases less smoke and no toxic smoke.

Poly vinyl chloride (PVC) & chlorinated polyvinyl chloride (CPVC) are comprised of 3 elements carbon, hydrogen & chlorine and is made from vinyl chloride monomer (VCM) which is very toxic.

VCM exposure has been linked to rare form of liver cancer, angiosarcoma. EPA has classified vinyl chloride as a Group A, human carcinogen.

To make PVC & CPVC more flexible plasticizers called phthalates are added. Phthalates are carcinogens and can leach out. When burned PVC produces more smoke than PP. When burned (building or back yard fires or incinerated) PVC & CPVC also produce a mixture of highly toxic gases such as hydrogen chloride and dioxins due to the chlorine in PVC & CPVC where PP does not.

U.S. EPA states:

"Dioxins are called persistent organic pollutants (POPs), meaning they take a long time to break down once they are in the environment. Dioxins are highly toxic and can cause cancer, reproductive and developmental problems, damage to the immune system and can interfere with hormones."

PVC also has a lower surface energy and ages faster when compared to PP.

Z-Flex® Joins Forces with Cox Geelen®

Z-Flex® North America's leading independent manufacturer of specialty venting systems for over 35 years; has joined forces with Cox Geelen®, one of Europe's leading innovators and manufacturers of polypropylene venting systems.

Cox Geelen's manufacturing roots date back over a century and are recognized today worldwide for their technical knowledge, OEM experience and environmentally responsible business philosophy in the polypropylene venting industry.

Z-Flex® is proud to offer this polypropylene venting system, branded Z-DENS, to our highly acclaimed product line-up which includes Z-VENT® and NovaVENT®.

Recent developments in flue systems for use with high efficiency heating appliances, combined with the increased familiarity of use and installer confidence in polypropylene venting systems, has led to the development and continuous improvement of the polypropylene Z-DENS system.

Designed and Tested Safe

Unlike most PVC and CPVC pipe:

- Z-DENS is specifically designed, tested and listed as a vent system.
- Z-DENS is manufactured from environmentally safe and sustainable fire retardant polypropylene, offering superior performance.
- Z-DENS does not require explosive or toxic cleaners, primers or cements; eliminating the safety and health concerns associated with these products.
- Z-DENS Self-Sealing design does not require any curing time, significantly reducing installation times and allows immediate system start up.
- Z-DENS can be used to vent appliances in New York City where PVC is **NOT PERMITTED**.

Z-DENS is available in diameters 2" (60 mm), 3" (80 mm), 4" (110 mm), 5" (125 mm), 6" (160 mm) and 8" (200 mm). Z-DENS is also fully compatible with Z-DENS FLEXIBLE and Z-DENS CONCENTRIC making for a complete and safe flue gas system.

Approvals

- Tested and Listed to ULC S636
- Conforms to the UL1738 requirements for category IV condensing appliances
- CE marked according to the European standard EN 14471
- Conforms to Gastec Qa 83-1

Recyclable

At the end of its life cycle, Z-DENS can be completely recycled.

26	2ZDWPT(24,35,46) or 2ZDWP(4,5,6)	Wall Plate
27	2ZDGL	Gasket Lubricant - See Note 4

Notes:

1. Z-DENS is Intertek listed to ULC S636 for zero clearance to combustibles and maximum flue gas temperature of 230°F.
2. Z-DENS conforms to UL1738.
3. Support Z-DENS at: appliance adaptor, elbows, vertically every 78" & horizontally every: 39" (3" to 8") & 19" (2") along the length.

4. Use only Z-DENS Gasket Lubricant: 2ZDGL to ease assembly of joints, apply sparingly on leading edge of gasket.
5. Z-DENS is recyclable and environmentally friendly.
6. Z-DENS is warranted as a vent system unlike most PVC & CPVC.

*Consult appliance manufacturer's instructions for approved vent applications

Z-DENS Single Wall

Z-DENS is certified for use with condensing gas and oil fired heating appliances having flue gas temperatures up to 230°F (110°C).

Specifications

- Specially developed, fire retardant polypropylene
- ULC S636 certified for flue temperatures up to 230°F (110°C)
- Resistant up to a max flue temperature of 248°F (120°C)
- Cat II, IV Special Gas Vent
- Gas Vent BH, Class IIc
- Suitable for use with negative and positive pressure appliances
- Pressure tested to 20 inches W.C. (5000 pa, level H1)
- Available in appliance white finish in diameters 2" and 3"*
*UV stabilized parts available
- Available in UV stabilized grey finish in diameters 4", 5", 6" and 8"

Significant Advantages

- Vent system made from fire retardant polypropylene
- Long lasting and easy to install as no cure time is required
- Greater resistance to acidic flue gas condensate
- No leaching of chloride, as found in PVC and CPVC reducing boiler contaminates
- No primer or glue containing VOC's
- Environmentally friendly
- Recyclable and LEED compliant
- Non-toxic smoke or fumes if burned, compared to PVC and CPVC

Safety

All polypropylene material expands and contracts with temperature change. To ensure that the installation initially is and remains completely flue gas tight, it is necessary that the Z-DENS locking clamps and brackets are used. For the correct installation of the locking clamp and bracket, follow the instructions in the installation manual (download at www.z-flex.com). Only by following these instructions can Z-DENS guarantee a safe and flue gas tight installation. Use only Z-DENS lubricant when installing Z-DENS polypropylene to ensure a quick, reliable and safe connection.

Environment

During the production of polypropylene flue gas systems less CO₂ is produced than with the production of traditional metal flue gas systems.

Design Considerations

Greater system efficiencies and a more aesthetically pleasing installation can also be achieved by using Z-DENS Concentric.

Specification

Approved polypropylene vent manufacturers

Supplier	Model
Z-Flex U.S. Inc. 20 Commerce Park N, Bedford, NH, 03110 Ph. 800-654-5600	Z-DENS Single Wall, Flexible, Concentric

Z-DENS Flexible

The flexible polypropylene vent system is specifically designed for connection to condensing gas or oil fired heating appliances with a maximum flue temperature of 230°F (110°C)

Specifications:

- Made from fire retardant polypropylene
- Resistant up to max flue temperature of 248°F (120° C)
- Operates in negative and positive pressure modes
- Pressure tested to 20" WC (5000 pa, level H1)
- Chimney termination is UV resistant, flexible is not UV resistant
- Designed as a vertical flue system installation but is safe to run at angles up to 45° from vertical
- Available in white

Simple installation is ensured because:

- Flexible pipe can be cut to length on site
- Coupling connectors allow easy joining of shorter lengths which can virtually eliminate waste
- Lightweight flue system for ease of installation
- Compact packaging due to its great flexibility
- Wide range of accessories

Installation

The installation manual of Z-DENS Flexible shows just how simple it is to assemble and install the flexible vent system.

Z-DENS Flexible installation instructions and [video are available](#) in the download section of our website at www.z-flex.com.

This flexible flue system is available in 3 diameters:

Nominal Diameter 2" (60 mm) 3" (80 mm) 4" (110 mm)

2" (60 mm)
3" (80 mm)

4" (110 mm)

Z-DENS Flexible Chimney Kits

- Kits are available in 25' & 35' lengths and 10' extension

Z-DENS Concentric

Z-DENS CONCENTRIC is precisely designed for use with condensing gas and oil heating appliances.

Certified to ULC S636 and CE Marked to European standards EN 1856-1 and EN 14471.

Z-DENS CONCENTRIC, through continuous improvement, is engineered for optimum performance.

The outer pipe is aluminum and the inner flue pipe is manufactured with fire retardant polypropylene.

(Please Note: Z-DENS CONCENTRIC can only be selected for use with high efficiency/condensing appliances.)

The inner pipe is centered in the outer pipe by the patented connection (Patent number: NL C 1022411). This system is available in concentric diameter sizes 2"/4" (60/100 mm), 3"/5" (80/125 mm) and 4"/6" (110/160 mm). Colour of outer pipe is white (RAL9016).

Significant Advantages

- The system is easy to assemble
- The system is particularly rigid
- It is modern in appearance
- The same system can be used indoors as well as outdoors
- Patent number: NL C 1022411
- Certified to ULC S636 Gas Vent-BH Class II C - 110°C/ 230°F
- CE Marked according the European standards EN 1856-1 and EN 14471

Z-DENS CONCENTRIC The Next Generation in Flue Systems

2"/4" | 3"/5" | 4"/6" (60/100 | 80/125 | 110/160 mm)

Z-DENS CONCENTRIC designed for use with condensing heating appliances. The system has an inner polypropylene flue outlet pipe which is centered in the outer aluminum air intake pipe by the patented CONNEX_T[®]-connection. The system is available in the nominal concentric measurements 2"/4", 3"/5" and 4"/6" (60/100, 80/125 and 110/160 mm), in the colour white (RAL 9016).

Vertical

Vertical Kit

Horizontal

Horizontal Kit

Additional Terminations

Z-DENS Concentric Terminations

Z-DENS CONCENTRIC TERMINATIONS are suitable for any condensing appliance.

Designed with exceptional features including; modern appearance, outstanding aerodynamics, rain water management, cleaning and concentric or collinear (horizontal & vertical kit) options.

Vertical Design Features:

- Upper roof part is made of black RAL9005; UV resistant polypropylene for 2"/4" (60/100 mm) and 3"/5" (80/125 mm) or aluminum cap and galvanized outer air intake pipe for 4"/6" (110/160 mm)
- Outer air intake pipe below roof is made of white RAL 9016 galvanized steel
- Flue pipe is made of fire retardant polypropylene
- **Icicle-Free** - The cap allows some rain water to enter vent reducing icicle formation and aids in diluting PH of condensate
- **Aerodynamics** - Outstanding aerodynamic behaviour, with very low influence of wind

Horizontal Design Features:

- Outer wall part is made of grey RAL7001 UV resistant polypropylene for 2"/4" (60/100 mm) and 3"/5" (80/125 mm) or white RAL 9016 aluminum end and galvanized outer air intake pipe for 4"/6" (110/160 mm)
- Flue pipe is made of fire retardant polypropylene
- **Nozzle/Water Outlet** - The specially designed nozzle end prevents ingress of rain water. A collector with drip edge makes sure rain water and condensation are drained directly to the ground and not down the wall.
- **Aerodynamics** - Outstanding aerodynamic behaviour, with very low influence of wind
- **Removing/Cleaning** - The removal to clean nozzle end is simple, only a screw driver is needed

Z-DENS ADDITIONAL TERMINATIONS

- Z-DENS has additional UV resistant polypropylene terminations including; pipes, 45° and 90° elbows all for use with stainless steel end screens.
- Z-DENS has additional stainless steel terminations including: tees with built in screens and horizontal low profile kits.

Z-Flex U.S., Inc. ("Z-Flex") provides a warranty for Z-DENS polypropylene products ("the Products") for a period of ten (10) years, expressly subject to the terms and conditions as set out in this Z-Flex warranty document ("the Warranty Document"). This Warranty Document is governed by the laws of the State of New Hampshire.

Z-Flex warrants that the Products are free of defects in material and workmanship for a period of ten (10) years after installation ("the Warranty Period"), provided that:

- The Products are installed, maintained and used in accordance with the Z-Flex installation instructions;
- The use of the Products is limited to those applications for which it was intended;
- The Products were purchased from an authorized Z-Flex dealer, retailer, or distributor;
- The Products were not modified or altered and not improperly serviced, inspected, or cleaned;
- Normal wear and tear, smoke damage, or damage caused by chimney fires is not covered by this warranty;
- Z-Flex expressly does not warrant that the Products are fit for purpose other than the purpose notified by Z-Flex in writing;
- The Products are inspected and maintained annually, beginning one (1) year after the date of installation and continuing throughout the Warranty Period;
- Proper installation, use, and maintenance is documented; and
- The system is installed by a professional installer.

If all obligations specified above are met, Z-Flex's obligation under this Warranty Document shall be limited to providing replacement parts for the defective and/or damaged (part of the) Product, provided that the claimant under the warranty:

- Notifies Z-Flex in writing within reasonable time after discovering the alleged defect or damage;
- Gives Z-Flex an opportunity to inspect the defective and/or damaged (part of the) Product prior to replacing it; and
- Submits a proof of purchase of the defective and/or damaged Product.

The warranty provided by Z-Flex shall not include the obligation to remove the defective (part of the) Product or the obligation to install the replacement (part of the) Product. Inspection, removal, labor, and installation costs are not covered by this warranty. The Warranty Period for the replacement (part of the) Product shall run for the remainder of the original Warranty Period for the defective and/or damaged Product.

The Product is intended solely for venting category II and IV appliances burning natural gas, propane, and oil. All other use of the Products is considered a misuse of the Product and voids the terms of this Warranty. Z-Flex accepts no responsibility for misuse of the Product.

The terms and conditions of this Warranty Document may not be modified, altered, varied or waived except with the express written approval of a corporate officer of Z-Flex.

The remedies described in this Warranty Document are the SOLE and EXCLUSIVE remedies Z-Flex shall provide. There are no warranties which extend beyond the description on the face of this Warranty Document. TO THE MAXIMUM EXTENT PERMITTED BY LAW, THE REMEDIES DESCRIBED IN THIS WARRANTY DOCUMENT ARE IN LIEU OF ANY AND ALL OTHER RIGHTS, INCLUDING WITHOUT LIMITATION ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF THIRD PARTY RIGHTS.

Z-Flex's liability for indirect and consequential damages including without limitation loss of profit, lost savings, and loss caused by interruption of operations, is expressly excluded. In no event shall Z-Flex's total liability exceed the purchase price of the Product, provided that Z-Flex's liability for indirect and consequential damages is expressly excluded.

Claims under this Warranty must be made within the warranty period in writing and directed to: In the USA; Warranty Claims, Z-Flex@US Inc., 20 Commerce Park North, Bedford, New Hampshire 03110, (603) 669-5136 or (800) 645-5600. In Canada; Warranty Claims, Z-Flex Inc., 452 Attwell Drive, Etobicoke, Ontario, M9W 5C3, (416) 679-0045. This Warranty gives you specific legal rights, and you may also have other rights that vary in different States and Provinces.

WARRANTY REGISTRATION CARD: Z-FLEX[®] For this warranty to be effective, this card must be completed upon purchase of the covered Z-DENS and returned to Z-Flex[®] within ninety (90) days of installation of the Z-DENS.

Original end-user's name: _____

Address of premises in which the Z-DENS is installed: _____

Z-DENS purchased from: _____

Powerful New Quoting Tool

The current economic climate demands companies employ lean and innovative strategies.

Z-Flex[®] has pinpointed a need and brought to market cutting-edge technology with the new quoting tool **ZQuote**[™]. Use this free powerful application **NOW!** to accelerate response times and quickly produce the detailed quotes you need.

ZQuote[™] is a revolutionary software solution that can quickly create detailed, dimensioned **Z-FLEX**[®] Vent System Layouts, accurate bill of materials and a quote proposal.

ZQuote[™] virtually eliminates the need for time consuming AutoCad drawings.

- Step 1** Complete and submit the **ZQuote**[™] Design Checklist found on our website.
- Step 2** Design information is entered into **ZQuote**[™]
- Step 3** **ZQuote**[™] produces a detailed layout drawing with part call outs, bill of materials and a detailed price quote.

ZQuote[™] is a proprietary quote system for use with **Z-FLEX**[®] Vent Systems.

Typical applications for **Z-FLEX**[®] Vent Systems include:
Boilers, Water Heaters, Tankless Water Heaters, Unit Heaters,
Pool Heaters, Hot Water Boosters, Gas Fired Steam Humidifiers.

Z-VENT[®] Smoothcore[™]
AL29-4C Stainless Steel flexible vent with smooth inside diameter for Category II, III & IV vent, in 2" to 8" with patented airtight Triple-Lock Construction & exclusive Z-LOK Tee.

Z-VENT[®] Single or Double Wall
AL29-4C Stainless Steel rigid vent for Category II, III, & IV vent in 3" to 24" diameters with revolutionary double fail safe seal that dramatically reduces the installed vent time and cost.

Triple Lock[®] & Fabriflex[™] Duct
Industry's strongest flexible air duct and connectors. Insulated, acoustical and mechanical lock with no adhesives. UL / ULC Listed for low, medium and high pressure applications.

Platinum Flow[™] Innovative **SELF SEALING** Round Duct System incorporates both factory installed EPDM double safe gaskets and calibrated sizing. Complete system available in single wall, double wall insulated, as well as custom design capabilities. Designed to exceed SMACNA's duct construction standards. Leakage Class 3.

Z-FLEX®

The Engineered Venting Systems Specialists

Recent developments in flue systems for use with high efficiency heating appliances, combined with the increased familiarity of use and installer confidence in polypropylene venting systems, has led to the development and continuous improvement of the polypropylene Z-DENS system.

Z-Flex® now offers the Z-DENS Polypropylene Venting System to our highly acclaimed product line-up.

The NovaFlex Group® is a privately held company committed to continuous advancement in venting, HVAC, hose and connector solutions. NovaFlex® has one of the broadest product ranges available in the hose and ducting marketplace as well as in the HVAC, Industrial Venting and Hose Industries and in Commercial Exhaust Venting Systems.

It is impossible to test all NovaFlex® and Z-Flex® products under all of the conditions to which they might be subjected in the field. It is therefore the buyer and/or end users' responsibility to test all products under conditions that duplicate service conditions prior to installation. Due to continuous improvements, technical data in this brochure is subject to change without notice. It is incumbent on installer to determine suitability of product for application and adhere to all local building codes that may or are applicable. Please defer to NovaFlex & Z-Flex terms and conditions of sale located at: www.novaflex.com/TermsConditions/
